Expression of Concern

Improving vascular maturation using noncoding RNAs increases antitumor effect of chemotherapy

Citation for this expression of concern: JCI Insight. 2018;3(11):e122387. https://doi.org/10.1172/jci.insight.122387.

The Editors recently became aware that the Endo40 and Endo42 samples in Supplemental Figure 4B appear to be similar. Additionally, in Supplemental Figure 9, the CH and CH/Endo28-NPs for the heart tissue appear to be the same. The Editorial Board is pursuing further investigation of this matter, and we will inform our readers of the outcome when the investigation is complete.
